

ZERO-COST MEDICATIONS

EFFECTIVE APRIL 1, 2025

Starting April 1, 2025, we're launching Script sourcing, which enables our employees and their dependents to access medications with a \$0 copay.

Yes, you read that correctly. Through Script sourcing there will be no copay for medications. It's important to note that Script sourcing is entirely separate from Aetna and CVS.

HOW DOES THIS WORK?

Most name brand medications are two to ten times more expensive in the United States than in other countries such as Canada, the United Kingdom, New Zealand, and Australia. Working with licensed pharmacies in those countries, Script sourcing buys FDA-approved medications and ships them to the United States, passing the savings along to partnering companies.

These countries maintain the same or higher standards as in the United States. All the medications are factory packaged and sealed at the pharmaceutical manufacturer.

Script sourcing will only ship FDA-approved name brand medications.

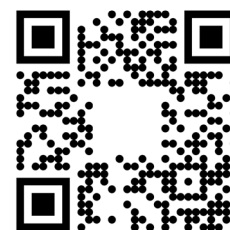

HOW TO GET STARTED?

Script sourcing does not provide every possible medication on the market today. Consequently, you will need to follow these steps to see if your specific medication is offered.

Search for your medication at www.scriptsourcing.com/med-finder (QR code to the right).

If your medication is carried, call a Member Advocate at 410-902-8811 to get your account set up and start saving.

You will need a U.S. doctor's prescription and it takes roughly three weeks to set up your account and to receive your first order.
